Any householder in Norway village who can accommodate two or more of the teachers Friday night and till Saturday afternoon will confer a great favor if they will hand their names to a Norway teacher or to Mr. Barnes. The grand jury was impaneled, sworn by the clerk and charged by the judge. They retired to their room. The names are:  
Darius S. Sanborn, Norway, foreman.  
R. P. Brown, Bethel.

Tuesday afternoon the equity case of Francis A. Fox against Sherman L. Gould was heard by the court. Both parties are lawyers. The controversy is over a tract of real estate in the town of Hiram. Plaintiff claims it through a sale on execution; defendant, by deed. Plaintiff claims also that if the defendant has any title it should be treated as a mortgage and in such a case that he should be allowed to redeem. It turned out during the hearing that plaintiff's bill was defective, which brought the hearing to an abrupt termination. If defendant consents it will probably be amended and put in shape for hearing in chambers in Portland, otherwise probably the bill will be dismissed.

Henry Donahoe of Byron was admitted to citizenship.  
The grand jury got to work, Tuesday morning, on the matters that are to be brought before them. It is understood that there will be a large amount of business coming before them.

In the afternoon a divorce case was tried. The libel case has three days to file answer to the libel.

The case of Russell T. Merrill against D. S. Sanborn, H. M. Jackson and Alvin Brown, growing out of his removal to the town farm a few years ago was settled by consent of the parties on the payment of \$125.00, and a similar case of Vera T. Merrill against the same parties was settled by payment of \$200.00. These cases were assigned for trial on Thursday but are out of the way.

The case of William J. Wheeler against the town of Sumner for a defect in a bridge and consequent injury to him was settled by the payment of \$15.

The cases of Leroy W. Thomas against the town of Mexico and of Cora E. Thomas against the same were assigned for trial Friday morning but were settled Wednesday.

This clears the docket for this week.

The regular temperance meeting was held, Wednesday evening. Hon. Geo. D. Deane presided and there were many eloquent speeches. The theme was re-submission of the prohibitory amendment, which was opposed vigorously. There was a good sized gathering.

The traverse juries were excused, Thursday morning, until Friday.

The grand jury is in session as we go to press.

Osgood Drew of North Fryeburg was in town a few days this week.

#### The New Church Plan.

The meeting of the Universalist parish was held Monday evening. A plan for the church edifice was submitted and adopted. An adjourned meeting was held on the lot Wednesday afternoon and the situation on the lot was decided. The edifice will stand back from the street on a lot of about one acre and will be both by location and appearance a credit to the society and village.

The audience room is planned to be 48x40, with a vestry on the rear connected with folding doors and being a room 24x35, a small room will be built on the easterly side partly on the vestry. This allows for an organ, when one is obtained.

A tower about the height of the ridge pole is planned. It will be square and flat topped. A number of steps will lead to it from Pine street and it will be the main entrance to the church. A smaller tower on Pine street at the junction of the audience room and vestry will provide entrance to both. A ladies' parlor is planned over the vestry. The basement will contain a dining room running the length of the building, except a stage at the rear end, at the same end a kitchen will be beside the stage on the Pine street side and next to it running to Stiles street will be the furnace and fuel room of abundant space. The vestry will be on the Stiles street side opposite the street. The capacity of the vestry will be about five hundred.

**License Law for Non-Resident Sportsmen to be Asked—Hearing on the Matter in January—Salmon Fry for Kezar Ponds—Squirrel Hunt in Woodstock.**

The Fish and Game Commissioners have sent out notice that a hearing will be given before the legislature in January, when the sportsmen will be asked to enact a special law to license visiting hunters who come to Maine for big game. Chairman Carleton of the commission is quoted as saying that it is useless to attempt any adequate warden service along the border of 200 miles and among the 10,000,000 acres of forest land with an annual appropriation of \$25,000, nearly two-thirds is spent in propagating fish. This state of affairs reduces the problem of game protection to one or two alternatives—either the money needed for adequate warden service must be raised by some means outside of direct taxation of the deer and moose must be taken of later become extinct.

It has not been decided just how this license law shall be assessed. It is possible that it may be decided to levy a fee upon sportsmen coming into the state or upon the carcasses of deer or moose taken out of the state. These questions together with the amount to be estimated must be settled by the next legislature.

The committee on inland fish and game was asked to put a license of from \$2.00 to \$5.00 upon every non-resident who goes to the woods after October 1, 1903. There can be no doubt but that a favorable report will be had on the proposition. It is also considered likely that the legislature will pass any reasonable license measure which may be proposed.

As an inducement for favorable action upon the measure Mr. Carleton will advocate the passage of a bill to reimburse the farmers for all crops destroyed by large game animals during close time. As the deer stands today the farmers are compelled to involuntarily pasture their deer among their oats and beans from May until October and are fined \$40 and costs for every animal shot while trespassing.

The farmers say that when open time is over the sportsmen from New York, or Boston come to the state and kill the deer that have grown fat upon their crops. By proposing to pay the board of the protected deer there is no doubt that Mr. Carleton is doing a service to the farmers and will make a point in winning the granger vote in the legislature, which is a very potent factor in this state.

A large fat fox ventured into the doorway of Horace Dinmore last Friday and went nosing around. Horace got his shot gun and now the jacket of Mr. Fox is stretching on a board in the sun.

Bethel Hall saw four deer in a group, after firing his last cartridge at one, near the Zircon House, South Rumford. Frank Ellis shot a deer at Bethel, October 1.

J. C. Sawyer of West Stoneham recently caught a salmon that weighed four and three-quarters pounds, and E. B. Sawyer caught one that weighed three pounds. They also got several large bass and pickers.

Reports that reach this office are that deer abound in large numbers throughout the county, and that the hunters are having good success in bringing them down. The total number of deer taken in the county up to Wednesday noon, so far as known by us, is 23, but the chances are more than even that the number is greater than this. Thus far there has been but one accident, Everett Fox of Kezar Falls accidentally shooting himself by the discharge of a revolver in his hip pocket. He will recover.

Davis, Freeman Whitman, Daniel M. E. Bryant, Harry Sanborn, George W. Davis, W. S. Davis, J. H. Davis. The defeated crew gave an oyster supper to the winners and their families and a time such as never took place before in the town of Woodstock is reported.

Frank S. Waldron, clerk at Stone's drug store, gave a supper of roast duck to a few friends at Beal's Hotel, Monday night. Waldron had spent several hours in the woods during the day looking for birds, but didn't find much good luck. Mell Sampson, however, came home that night with a few ducks and hearing his hard luck presented him with a pair of the birds he had taken during the day. The supper was a fine affair and was greatly enjoyed by the select few present.

# BONE FOOD

Soft and crooked bones mean bad feeding. Call the disease rickets if you want to. The growing child must eat the right food for growth. Bones must have bone food, blood must have blood food and so on through the list.

Scott's Emulsion is the right treatment for soft bones in children. Little doses every day give the stiffness and shape that healthy bones should have. Bow legs become straighter, loose joints grow stronger and firmness comes to the soft heads.

Wrong food caused the trouble. Right food will cure it. In thousands of cases Scott's Emulsion has proven to be the right food for soft bones in childhood.

## Uncommon Animal, This.

Cross Between a Durham Cow and Maine Moose Owned by J. F. Cornish—Blind, Hair and Wild—Museum After It.

A cross between a red flannel shirt and a red deer's skin, the animal now traveling through Maine in charge of J. F. Cornish of Bowdoinham. It is a four-months' old animal born in that town, the mother being a cow and the father a moose, which had spent many happy days with the former in the green pastures on Mr. Cornish's farm.

The little fellow is totally blind, is of the color of a moose and has the compound parts of a deer and a moose. In the center of the back is a hump, much after the pattern of a camel, while the head is shaped like a sheep. The horns, what there is of them, look like those of the ram, and the hoofs are built from the model of a deer's. It has no tail and its legs are short and stocky, giving evidence of great strength and a suggestion of a bit of speed if trouble is anywhere near.

The mother of the animal was a two-year-old Durham heifer, which had been running wild in the woods and fields during the greater part of the summer, but in early June came to the barn of her own accord and gave birth to the calf soon after. Later she took to the woods and has not since been seen.

Her offspring has had no great liking for any cow's milk, but prefers green brush that is young and tender with plenty of leaves on the branches. It turns its head away from good hay or straw, will not eat meal and refuses to drink from a bucket.

When dogs approach it jumps and rears and tears at a great rate, making vain attempts at getting away from its leash. It has no particular liking for human beings but to Mr. Cornish it takes kindly, probably having sense enough to realize that if it gets away from him it will have hard work, having no eyesight, in picking up a living.

Men who are wise in matters pertaining to the cow and moose family have had a look at the animal, but thus far none have had the hardihood to suggest any reason why such an animal should happen to come into the world, unless the Durham heifer made love to and eloped with a bull moose during her hours of leisure.

Mr. Cornish has showed the animal at a few fairs, and has had several offers from representatives of museums in different parts of the country to take the animal and bring it up in the ways he should go. It is not unlikely that he will finally land in the New York zoological garden. O. WARREN BROWN.
